

## Gingerbread House 10267 Lighting Kit

### Package contents:

- 10 x 15cm Warm White Dot Lights
- 4 x 30cm Flashing Red Dot Lights
- 4 x 30cm Flashing White Dot Lights
- 1 x 15cm Warm White Light
- 1 x Warm White Strip Light
- 2 x 5cm Connecting Cables
- 4 x 15cm Connecting Cables
- 4 x 6-port Expansion Boards
- 1 x 12-port Expansion Board
- 1 x Multi Colour Light String
- 1 x Flicker Effects Board
- 1 x USB Cable

Extra LEGO pieces

### Note:

Place wires on the surface or under the LEGO building blocks.

The wire can be placed between the building blocks or under the block, but they should be placed between the studs correctly.

Insert the connectors to the ports.

Be careful when you are operating, there's only one correct way to insert, make sure the expansion board is upward, find the soldered "=" sign on the left of the port. When you are inserting, the side which the wires can be seen should be faced to the "=" sign and if you feel hard to insert, please stop, and don't force it, for that may result in bent pins inside the port or overheating of the expansion board.

At this point, use the tweezers to straighten the bent pins.

When installing dot lights, make sure they are correctly placed (Yellow LED package is exposed). You can put them either on the top of the studs or between studs.

## Connecting cable connectors to Strip Lights

Take extra care when inserting connectors to ports on the Strip Lights. Connectors can be inserted only one way. With the Strip Light facing up, ensure the side of the connector with the wires exposed is facing down. If a plug won't fit easily into a port connector, don't force it. Doing so will damage the plug and the connector.

Finally, please pay attention to the positive and negative terminals of the battery when installing the battery case.

## Instructions for installing this kit:

OK, Let' s Begin!

Start from installing lights for the Christmas tree

Disconnect the leaves

Remove the red 1x1 pieces from the following 2 leaves

Disconnect the leave as per below

Take 2 red flashing 30cm dot lights, 2 trans red 1x1 pieces

With lighting part facing up, secure the light with the trans red 1x1 piece

Place the cable as per below, reconnect the leave piece we removed before to secure the cable of the light

Similarly, with lighting part facing up, secure the light with the 1x1 trans red piece

Take 2 red flashing 30cm dot lights, 2 trans red 1x1 pieces, repeat the steps above to install lights for another leave

Move onto installing lights for the following leaves

Disconnect the following pieces

Take 2 white flashing 30cm dot lights

With lighting part facing up, secure the light with the trans yellow piece

Place the cable as per below, reconnect the piece we removed

Also, with lighting part facing up, secure the light with the trans yellow piece

Take 2 white flashing 30cm dot lights, repeat the steps above to install lights for another leave

Reconnect the 4 pieces of leaves back to the trunk

Group the cables together as per below

Continue to install lights for the house, begin with the lamps at the front of the door

Remove the second floor and the roof above the door

Remove the 2 lamps, disassemble one of them as per below

Take a warm white 15cm dot light, thread the light through the trans yellow lampshade

Pull the cable out, reconnect the lamp

Wind the cable twice before reconnecting the lamp

Take another warm white 15cm dot light, repeat the previous steps to install the other lamp

Lift the floor as per below, thread the cable through the gap to the inside

Close up the gap, reconnect the roof

Take a 15cm light, a trans round 2x2 plate

Turn the house to its side, connect the light to the ceiling of the kitchen with the trans piece

Remove the beams as per below

Take a 6-port expansion board, connect the 3 cables to it

Tuck excess cables, stick the expansion board to the following place with the adhesive square

Take a warm white strip light, a 15cm connecting cable, a 1x6 white plate

Connect the connecting cable to the strip light, stick the strip light to the plate

Connect the strip light to the ceiling of the living room

Lift the white plate next to it to allow the cable thread through, reconnect the white plate

Connect the connecting cable to the expansion board

Reconnect the beams

Continue to install light for the left window

Take a warm white 15cm dot light, lift the white piece above the window as per below

Thread the cable through the gap to the inside, close the gap, make sure the head of the light is at the outside

Remove the following brown 1x6 plate, place the cable as per below

Reconnect the 1x6 brown piece

Remove the following piece, connect the cable of the light to the expansion board

Reconnect the pieces we removed

Move onto installing light for the right window

Take a warm white 15cm dot light

Remove the window hood, place the light as per below

Reconnect the window hood, leave the light outside, thread the cable to the inside

Now, we' ll install lights for the corridor

Take a warm white 15cm dot light, a trans round 2x2 plate

Place the light at the center of the 2x2 trans round piece, and connect the light to the roof of the corridor as per below
