

Grand Piano 21323 Light Kit

Thank you for choosing Vonado lighting products. We are committed to LEGO product study and lighting development, and we're always trying our best to provide LEGO fans with the best products and the best installation ideas.

Must be careful observation, imagination can be infinitely.

We provide basic parts to support your imagination.

DO IT YOURSELF .that's what LEGO is .

As always, Lego has been adhering to the DIY philosophy from product selection, research and development to sales. Consumers buy the parts, you will assemble them by yourself, and you can experience every step from picking up the first piece to installing the last one. Besides, LEGO has different answers for the installation form and method of each part. Vonado lighting also does not want to kill your unlimited creativity, we will try our best to make products with high variability, high playability and unlimited play. If you have any dissatisfaction or your own ideas on the parts such as the color of the lights, the length of the cables, the installation position of the product, and the final effects of each module, you can make your own arrangement, and we will cooperate with you to replace or repurchase.

LETS MOVE!

- 3 x RGB Soft Strip Lights
- 1 x 6 -port Expansion Board
- 1 x AAA Battery Pack
- 1 x USB Cable
- 1 x RGB Remote Control Switch Board

Extra pieces

(product display)

Note:

Place wires on the surface or under the building blocks.

The wire can be placed between the building blocks or under the block, but they should be placed between the studs correctly.

Insert the connectors to the ports.

Be careful when you are operating, there's only one correct way to insert, make sure the expansion board is upward, find the soldered "=" sign on the left of the port. When you are inserting, the side which the wires can be seen should be faced to the "=" sign and if you feel hard to insert, please stop, and don't force it, for that may result in bent pins inside the port or overheating of the expansion board.

At this point, use the tweezers to straighten the bent pins.

When installing dot lights, make sure they are correctly placed (Yellow LED package is exposed). You can put them either on the top of the studs or between studs.

Connecting cable connectors to Strip Lights

Take extra care when inserting connectors to ports on the Strip Lights. Connectors can be inserted only one way. With the Strip Light facing up, ensure the side of the connector with the wires exposed is facing down. If a plug won't fit easily into a port connector, don't force it. Doing so will damage the plug and the connector.

Finally, please pay attention to the positive and negative terminals of the battery when installing the battery case.

OK, Let's Begin!

Instructions for installing this kit:

Piano 21323 Lighting Kit, 12 bags in total, 11 bags with labels, 1 bag without label, as per below:

Power supply: AAA Battery Pack and the USB Cable (self-contained battery, power bank or the mobile phone charger) .

Firstly, take the battery pack (with batteries installed) or the USB cable (connected to the power bank or the mobile phone charger), connect it to the expansion board to verify all the lights one by one.

After the verification, disconnect the lights, put them back to the package.

(note: put the lights back to the bag after verification of lights in the same bag is done, then, continue to verify the lights in another bag.)

OK, Let' s Begin! (you can use the tweezer if necessary.)

(Tips: the tweezer is sharp, you should be careful when using it, do not hurt yourself or scratch the pieces; be gentle and do not wear the cables.)

Instructions for installing this kit:

OK, Let' s Begin!

Take the piano, disconnect the following 2 bolts underneath it.

Remove the following piano keyboard and the plate.

Take 3 RGB soft strip lights, two 15cm RGB connecting cables, a 30cm RGB connecting cable, assemble them as per below.

Take the plate, lift it as per below.

Stick a strip light to the following place on the plate.

Stick the second strip light at the middle place, wind excess cable and press it underneath the strip light.

Stick the third strip light at the right side as per below, wind excess cable and press it underneath the strip light.

Disconnect the following 3 black pieces.

Thread the cable alongside the base, place it in between the beige piece and the black piece as per below.

Reconnect the black pieces.

Pull the cable out behind the following plate.

Thread the cable through the following space underneath the piano.
